

# Math 221 Syllabus

Masanori(Maso) Koyama (TA) Section 325, 324

September 4, 2007

## Textbook

Weir, Hass and Giordano: Thomas' Calculus 11th Edition, Addison Wesley Non-ET version, including differential equations. ISBN: Old style, 0-321-49069-X; New style, 9780321490698. (Make sure that you have the right version)

## Topics

When you are done with the course, you will have mastered:

- Limits and Continuity
- Differentiations
- Integrations
- Based application of single variable calculus
- Transcendental Functions

## Homeworks/Quizzes

Posted on Professor's website (listed at the end of syllabus). Homeworks are due beginning of the first discussion section of the week (the Monday one). There will also be a short quiz every week, Wednesday!!

## Grading

Midterm 1	30%
Midterm 2	30%
Final	40%

Participation in the discussion section and the homework/quiz performance will affect your borderline grade!!!!

### Example

An active, diligent guy/gal who shows up in every discussion section, does all homeworks, owns the quizzes and has 89.5 average  $\implies$  gets AB !!!

Lazy guy/gal who ditches discussion section time to time, misses homeworks, gets destroyed by quizzes and has 89.5 average  $\implies$  gets B...

## Instructor

Prof : Donald Passman

<http://www.math.wisc.edu/~passman/221-07.html>

Lecture Location: B102

## My Contact

Email: "last name"@math.wisc.edu

Office: 101 Van Vleck Hall

**Office Hours: We are going to talk about it today.**
